

A New Standard In CR Packaging

SnapSlide®

Arthritis Friendliness

Arthritis-friendliness is fundamental to SnapSlide.

SnapSlide began with one goal: help a grandmother with arthritis open a child-resistant bottle. Today, SnapSlide eases that task for millions.

Arthritis Friendliness

In 2024, SnapSlide Inventor/CEO Rocky Batzel was one of three panelists on “Design for Packaging Accessibility” at the AMERIPEN Annual Summit.

Deb Gokie
VP Consumer Health & Ease of Use
Arthritis Foundation

Rocky Batzel
Inventor/CEO

Andrew Hurley, PhD
Professor of Packaging Science
Clemson University

Arthritis Friendliness

Brad Fain, Ph.D.

Principal Research Scientist Georgia Institute of Technology

A pioneer in the field of accessibility, Dr. Fain conducts the Arthritis Foundation's Ease Of Use protocol.

"I evaluated SnapSlide with users with Arthritis at the Intuitive Design Applied Research Institute and found the reaction to be **very favorable among research participants**. SnapSlide is an innovative technology that is poised to bring improved outcomes to consumers of various abilities. I look forward to seeing this technology in the marketplace and applaud SnapSlide's contribution to inclusive design."

Walter
Arthritis In Hands

“I’ve had arthritis for years. It gets worse overtime and it’s becoming increasingly difficult for me to open normal pill dispensers.

This is an absolute godsend to me.”

Thank you
