Custom Products

Leading Supplier Of Pill Cards For
Robotic Dispensing Systems For 10+ Years

SynMed Cards are Designed with CPhT input

User-friendly blisters separate with ease to improve efficiency

Aggressive adhesive assists with sealing in corner while on tray

Backside numbering makes it easy to identify fills < 31 ct.

SynMed Cards are Designed with RPh input

Peel Away Liner on back of card eliminates pills coming in contact with adhesive

Five day reorder point improves workflow and reduces returns

Lay flat card design helps prevent stoppage or error messages

Stock SynMed Pill Cards

SynMed Front

Item S1315F / S1316F / S1318F

SynMed Back

Item S310B

SynMed Pill Cards are sold in two components packaged separately - Fronts and Backs.

Each pill card Front comes with an attached blister. The Back of the card is sold separately and includes a removable liner that protects the adhesive.

Stock Synmed Fronts are available in three blister sizes

Item S1316F
Extra Large

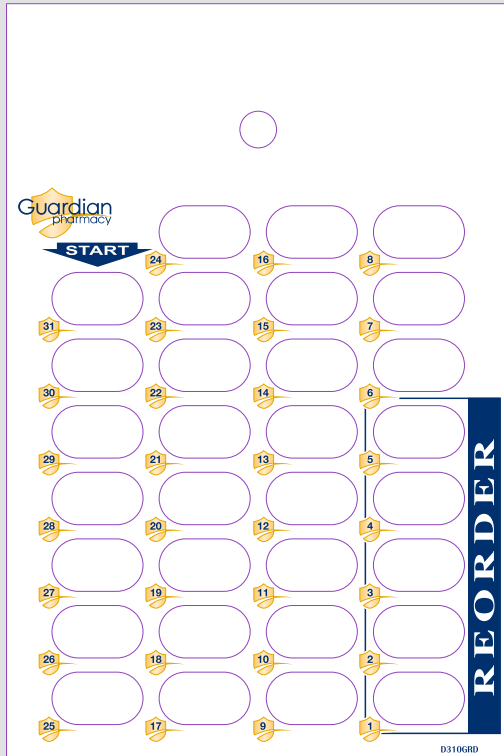

Item S1318F
Oversize

SynMed's **MASS PARAMETER INDEX** allows for the use of shallower blisters, including a 3/8" deep blister that helps maximize capacity during storage and inside Medication Carts by adding 33% more space vs a 1/2" deep blister.

Heat Seal Equipment

AutoSealer

Standard Features & Specs

AutoSealer

Overall dims: 14.5"L x 17"W x 9.75"HT

Weight: 47 lbs

Electrical: 115 volt, 12 amp, 1380 watts

- Controlled temperature, time and pressure for worry-free seal.
- Safe two hand operation.
- Emergency shutoff.
- Adjustable sealing time.
- Unique paddles reduce moisture during seal.
- More energy efficient than any other pill card sealer on the market.
- Better heat components, insulation, and customized controller.
- Less problems & minimal maintenance with fewer moving parts than any other motor controlled sealer.
- Presents Live Batch / Cycle Count during operation.

Accessories

- Sealing Paddles
- Sealing Trays
- Pressure Board (used w/ Sealing Trays)

Warranty

- FULL Two Year warranty
- Extended service contracts available.

Specifications subject to change without notice.

AutoSealer

The only documented 3 second heat sealer on the market!

Fast, Convenient, and Safe!

- **FAST**, 3 Second Seal Time is unmatched.
- **CONVENIENT**, Motor senses the correct amount of pressure, single dose and multi dose cards can be used without making any adjustments
- Air cooled outer shell provides a **SAFE** unit.
- Easy access and quick change parts for routine maintenance when required.
- Flat top design creates additional workspace.

Our industry leading 3-second seal time is a result of 1,200 lbs of pressure (compared to 500 lbs from other electric sealers).

The motor senses the correct amount of pressure on every seal, which eliminates any conversion when sealing taller (3/4") Multi-Dose or Single Dose blisters.

The outer shell is cooled by pulling cool air through multiple vents, including a fully cooled opening. The 2-button design to activate the heat plate makes the unit safe and reduces the risk of injury.

This high volume AutoSealer is built to last significantly longer than any other sealer on the market. It requires minimal maintenance and allows for easy access to fuses and other components. The unit only requires a 115 electric outlet, and does not require air compressor lines or additional hoses. There are no springs, excess relays, or switches.
